

EXPLORER

Julbo
The world needs your vision*

HIGH-TECH FOR THE HIGHEST MOUNTAINS

reference : 326511

The highest mountains and extreme conditions bring out the best in these sunglasses that have been developed in collaboration with the elite climbing school in Chamonix. The Explorer takes glacier sunglasses to the next level: lenses with impressive protection, coverage from damaging UV rays, an anti-fog ventilation system...

Technical features

RX

The frame can be equipped with corrective solar lenses.

Front venting

Natural front air flow thanks to the lens shape or mounting structure

Adjustable Strap

Hold and security, strap length can be adjusted

Grip tech

Inserts at stem ends for comfort and hold, does not stick to hair

360° Adjustable temples

Stem ends bend in every direction, easy to wear and good hold when worn with helmet, beanie or simply alone

Removable Wings

Lateral protection against harsh sunlight

Total Coverage

Maximum protection in extreme conditions against harsh sunlight

Lenses

Alti Arc

The glass lens : Of superior optical quality and highly resistant to scratches and bumps, they are ideal for the desert and high altitudes. The Altitude Arc lens is the name for glacier goggles. The various lens treatments (anti-reflections, flash, active darkening principle) allow them to eliminate parasite reflections and reinforce filtering.

SPECTRON 4

Light but with excellent shock resistance, this versatile lens is suitable for all types of sports activities.

Anti-reflective coating: improves visual comfort by eliminating stray reflections.

Flash finish: improves visible light filtering with mirror effect lenses. It reflects the rays of light and increases the filter effect. It eliminates the radiation reflected by the outer mirrored surface of the lens.

CAMEL

Excellent polarization

High protection

High-definition vision

Visual comfort

Rapid activation: the lenses darken quickly to category 4
