### Total Coverage

Maximum protection in extreme conditions against harsh sunlight

### removable side shields

### wraparound style

### elastomer endtips for improved hold

## Lenses

### Alti Arc +

Anti-reflective coating: improves visual comfort by eliminating stray reflections.

Burnished finish: enhances visible light filtering. Ideal for use in desert or high mountain. Optimum protection against visible light.

Flash finish: improves visible light filtering with mirror effect lenses. It reflects rays of light and increases the filter effect. It eliminates the radiation reflected by the outer mirrored surface of the lens.

### SPECTRON 4

Light but with excellent shock resistance, this versatile lens is suitable for all types of sports activities. Anti-reflective coating: improves visual comfort by eliminating stray reflections.

Flash finish: improves visible light filtering with mirror effect lenses. It reflects the rays of light and increases the filter effect. It eliminates the radiation reflected by the outer mirrored surface of the lens.

### ZEBRA

This light-sensitive lens, developed for the Speed range, is ideal for mountain biking, trail running and climbing.

Light-sensitive: the lens turns darker or lighter depending on the intensity of the light.

Amplitude cat. 2 to 4.

High speed reaction: 22 to 28 seconds.

Exceptional anti-mist treatment: no condensation, maximum lifetime.

### CAMEL

Excellent polarization; High protection; High-definition vision; Visual comfort; Rapid activation: the lenses darken quickly to category 4.
